Monthly Factsheet - 30/09/2025

INVESTMENT OBJECTIVE

Carmignac Portfolio Credit is an international fixed income UCITS that implements credit strategies across the globe. Its flexible and opportunistic style enables the Fund to implement an unconstrained and conviction-driven allocation. The fund aims to outperform its reference indicator over a minimum recommended investment period of 3 years.

Fund management analysis can be found on P.3

FUND MANAGEMENT ANALYSIS

MARKET ENVIRONMENT

- Economic data in the United States gradually strengthened during September, with initially mixed signals on employment, particularly due to the severe storms in Texas, followed by jobless claims returning to their July levels at the end of the month.
- Despite stronger than expected inflation and resilient growth in retail sales, FED decided to deliver a first rate cut of -25bps this year. That said, the Committee clearly remains divided on the path ahead with a wide dispersion of the individual dots.
- In the eurozone, statistics were also positive with leading indicator emerging above expectation at end of the month notably on the services component which was lagging so far. Inflation accelerated to +2.1% YoY as of end of August while core inflation exceeded expectation at +2.3% and second quarter GDP was revised upward to +1.5%.
- ECB's September meeting has resulted in a status quo on monetary policy, Christine Lagarde's speech was perceived as moderately hawkish due to the absence of any commitment to future rate cuts.
- Sovereign yields ended the month with contrasting dynamics across the Atlantic. In the US, the curve flattened as the 2Y yield being steady while the 10Y declined by -8bps. In Germany, the curve bear-flattened with the 2Y rising by +8bps while the 10Y remained unchanged. On credit side, risk appetite remained strong, leading to a tightening of spreads of -6bp of the iTraxx Xover index in September.

PERFORMANCE COMMENTARY

- The Fund delivered a strong absolute and relative performance in September.
- Our rigorous security selection proved particularly effective, with a positive contribution from our investments in special situations.
- We continue to redeploy subscription proceeds in the primary market, which offers relevant opportunities.
- Finally, we are maintaining exposure of around 8% of the Fund's net assets to the collateralized loan obligation (CLO) segment, which is performing steadily.

OUTLOOK AND INVESTMENT STRATEGY

- We continue to focus on our core investment themes through a selection of high-yield bonds, energy, financials, and our CLO selection.
- Given the current valuation level of credit markets, we maintain a high level of market hedging, which now accounts for 16.1% of the Fund's net assets.
- After years of weakness due to abundant liquidity and low cost of capital, default rates are expected to return to more normal levels, which we see as a catalyst for creating real idiosyncratic opportunities.
- Finally, the portfolio's high carry (approximately 5.7%) and attractive credit valuations should mitigate short-term volatility and help generate medium
- and long-term performance.

GLOSSARY

Active Management: An investment management approach where a manager aims to beat the market through research, analysis and their own judgement.

Bottom up investing: Investment based on analysis of individual companies, whereby that company's history, management, and potential are considered more important than general market or sector trends (as opposed to top down investing).

Credit cycle: A credit cycle describes the different phases of access to credit by borrowers. It alternates between periods of easily accessible funds to borrow due to low interest rates and periods of contraction where lending rules are more restrictive and interest rates are higher.

Forward financial instruments: A forward contract is a customized contract between two parties to buy or sell an asset at a specified price on a future date. A forward contract can be used for hedging or speculation, although its non-standardized nature makes it particularly apt for hedging. Unlike standard futures contracts, a forward contract can be customized to any commodity, amount and delivery date. A forward contract settlement can occur on a cash or delivery basis.

High yield: A loan or bond rated below investment grade because of its higher default risk. The return on these securities is generally higher.

Investment grade: A loan or bond that rating agencies have rated AAA to BBB-, generally indicating relatively low default risk.

Net asset value: Price of all units (in an FCP) or shares (in a SICAV).

Non-benchmarked: Portfolio construction is a result of Fund manager views and market analysis with no bias to any benchmark.

SFDR Fund Classification: Sustainable Finance Disclosure Regulation (SFDR) 2019/2088. EU Act that requires asset managers to classify funds into categories, "Article 8" funds promote environmental and social characteristics, "Article 9" funds have sustainable investments as a measurable objective. In addition to not promoting environmental or social characteristics, "Article 6" funds have no sustainable objectives. For more information, please refer to <https://eur-lex.europa.eu/eli/reg/2019/2088/oj>

SICAV: Société d'Investissement à Capital Variable (Open-ended investment company with variable capital)

UCITS: Undertakings for Collective Investments in Transferable Securities.

UCITS funds are authorised funds that can be sold in any country in the EU. UCITS III regulations allow funds to invest in a wider range of financial instruments, including derivatives.

Yield to Maturity: Yield to Maturity (YTM) is the estimated annual rate of return expected on a bond if held until maturity and assuming all payments made as scheduled and reinvested at this rate. For perpetual bonds, the next call date is used for computation. Note that the yield shown does not take into account the FX carry and fees and expenses of the portfolio. The portfolio's YTM is the weighted average individual bonds holdings' YTM within the portfolio.

(1) of the amount you pay in when entering this investment. This is the most you will be charged. Carmignac Gestion doesn't charge any entry fee. The person selling you the product will inform you of the actual charge.

(2) We do not charge an exit fee for this product.

(3) of the value of your investment per year. This estimate is based on actual costs over the past year.

(4) of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the investments underlying the product. The actual amount varies depending on the quantity we buy and sell.

(5) when the share class overperforms the Reference indicator during the performance period. It will be payable also in case the share class has overperformed the reference indicator but had a negative performance. Underperformance is clawed back for 5 years. The actual amount will vary depending on how well your investment performs. The aggregated cost estimation above includes the average over the last 5 years, or since the product creation if it is less than 5 years.

(6) Please refer to the prospectus for the minimum subsequent subscription amounts. The prospectus is available on the website: www.carmignac.com.

MAIN RISKS OF THE FUND

CREDIT: Credit risk is the risk that the issuer may default. **INTEREST RATE:** Interest rate risk results in a decline in the net asset value in the event of changes in interest rates. **LIQUIDITY:** Temporary market distortions may have an impact on the pricing conditions under which the Fund might be caused to liquidate, initiate or modify its positions. **DISCRETIONARY MANAGEMENT:** Anticipations of financial market changes made by the Management Company have a direct effect on the Fund's performance, which depends on the stocks selected.

The Fund presents a risk of loss of capital.
