

# CARMIGNAC PORTFOLIO GRANDCHILDREN F EUR ACC

LUXEMBOURG SICAV SUB-FUND

Recommended  
minimum investment  
horizon:

LU2004385667

Monthly Factsheet - 28/11/2025

## INVESTMENT OBJECTIVE

A global equity fund that invests in high quality companies that generate a positive outcome to society and the environment. The Fund is benchmark agnostic and has no restrictions in terms of geography, sector type or market capitalisation, though it is mainly tilted towards larger companies in developed markets. Companies are selected upon a rigorous investment process which combines quantitative screening with fundamental analysis and embeds a socially responsible approach. The Fund seeks to achieve long-term capital growth over a minimum period of 5 years.

Fund management analysis can be found on P.3

## PERFORMANCE

Past performance is not necessarily indicative of future performance. Performances are net of fees (excluding possible entrance fees charged by the distributor).

## FUND MANAGEMENT ANALYSIS

### MARKET ENVIRONMENT

- Equity markets were broadly unchanged in November, but performance varied significantly beneath the surface.
- Growth stocks, despite solid fundamentals, struggled to lead, while traditionally defensive areas like healthcare and consumer staples saw a clear rebound.
- The end of the U.S. government shutdown did little to boost sentiment, as investors remained cautious amid mixed economic signals, questions around the growth outlook, and uncertainty on the direction of monetary policy.
- Q3 earnings season ended on a strong note. In the U.S., 81% of S&P 500 companies beat expectations, with earnings up 13% year-on-year. Tech results were particularly strong, but the market didn't react, suggesting that expectations are already high.
- In Europe, financials and technology continued to deliver solid results, while consumer sectors, especially autos, were weaker. European equities slightly outperformed, supported by robust earnings growth prospects for 2026.
- Elsewhere in Asia, markets softened as investors took profits after a strong year, with Korea and Taiwan retreating following a pullback in AI-related names.

### PERFORMANCE COMMENTARY

- In November, the Fund delivered a negative absolute and relative performance.
- The relative underperformance was mainly driven by the technology sector as November marked the sharpest tech-led correction since April.
- This downturn was driven by elevated valuations and bubble concerns, compounded by fading expectations for Fed rate cuts mid-month.
- Strong compounders such as Microsoft and ServiceNow were also caught in the selloff, penalized by macro-driven sentiment and AI-related execution concerns, despite solid fundamentals and strong prior performance.
- Conversely, after several months of softness, our healthcare holdings delivered strong absolute returns. Eli Lilly led the way, surging about 25% on the back of robust EPS and revenue growth.
- Similarly, our consumer staples positions, including Colgate and L'Oréal, posted solid gains, highlighting their resilience amid market volatility.

### OUTLOOK AND INVESTMENT STRATEGY

- Our macroeconomic framework continues to advocate a defensive positioning, as valuation remains a key concern at the overall market level.
- During the month, we made several portfolio adjustments fully exiting our positions in Danaher and Eli Lilly following their strong performance.
- We initiated new positions in Arista Networks and Doximity after recent weakness, as both companies demonstrate solid growth prospects and robust balance sheets.
- Defensive sectors are trading at their most attractive relative valuations in nearly two decades, offering resilience and diversification benefits should growth expectations disappoint.
- In the current environment, earnings visibility is likely to be increasingly rewarded. We therefore maintain a disciplined stance, limiting exposure to cyclical sectors in favour of quality.
- Our portfolio remains positioned to benefit from secular growth trends such as AI and digital transformation, while maintaining the flexibility and discipline needed to navigate an uncertain macro backdrop.

## PORTFOLIO ESG SUMMARY

This financial product is classified as an Article 9 fund under the EU's Sustainable Financial Disclosures Regulation ("SFDR"). The binding elements of the investment strategy used to select the investments to attain the sustainable objective are :

- A minimum of 80% of the Sub-Fund's net assets are invested in sustainable investments aligned positively with the United Nations Sustainable Development Goals;
- The minimum levels of sustainable investments with environmental and social objectives are respectively 10% and 30% of the Sub-Fund's net assets;
- Equity Investment universe is actively reduced by at least 25%;
- ESG analysis applied to at least 90% of issuers;
- 50% of carbon emissions lower than the reference indicator as measured by carbon intensity.

### ALIGNMENT WITH THE UN SUSTAINABLE DEVELOPMENT GOALS (NET ASSETS)

### United Nations Sustainable Development Goals (SDGs)

SDG alignment is defined for each investment by meeting at least one of the following three thresholds.

1. Company derives at least 50% of its revenue from goods and services that are related to one of the following nine SDGs: (1) No Poverty, (2) No Hunger, (3) Good Health and Well Being, (4) Quality Education, (6) Clean Water, (7) Affordable and Clean Energy, (9) Industry, Innovation and Infrastructure, (11) Sustainable Cities and Communities, (12) Responsible Consumption and Production.
2. Company invests at least 30% of its capital expenditure in business activities that are related to one of the aforementioned nine SDGs.
3. Company achieves aligned status for operational alignment for at least three out of all seventeen of the SDGs and does not achieve misalignment for any SDG. Evidence is provided by the investee company's policies, practices and targets addressing such SDGs.

To find out more about the United Nations Sustainable Development Goals, please visit <https://sdgs.un.org/goals>.

### MSCI ESG SCORE PORTFOLIO VS REFERENCE INDICATOR (%)

Source: MSCI ESG Score. ESG Leaders represent companies rated AAA and AA by MSCI. ESG Average represent companies rated A, BBB, and BB by MSCI. ESG Laggards represent companies rated B and CCC by MSCI. Portfolio ESG Coverage: 100%

### CARBON EMISSION INTENSITY (T CO2E/USD MN REVENUES) converted to Euro

Source: MSCI, 28/11/2025. The reference indicator of each Fund is hypothetically invested with identical assets under management as the respective Carmignac equity funds and calculated for total carbon emissions and per million Euro of revenues.

### TOP 5 ESG RATED PORTFOLIO HOLDINGS

| Company               | Weight | ESG Rating |

Source: MSCI ESG

**Carbon emissions figures** are based on MSCI data. The analysis is conducted using estimated or declared data measuring Scope 1 and Scope 2 carbon emissions, excluding cash and holdings for which carbon emissions are not available. To determine carbon intensity, the amount of carbon emissions in tonnes of CO<sub>2</sub> is calculated and expressed per million dollar of revenues (converted to Euro). This is a normalized measure of a portfolio's contribution to climate change that enables comparisons with a reference indicator, between multiple portfolios and over time, regardless of portfolio size.

Please refer to the glossary for more information on the calculation methodology

\* Reference Indicator: MSCI World NR index. The reference to a ranking or prize, is no guarantee of the future results of the UCIS or the manager. For more information regarding product disclosure, please refer to the Sustainability-related Disclosures in accordance with Article 10 available on the Fund's webpage.

## GLOSSARY

**Active Management:** An investment management approach where a manager aims to beat the market through research, analysis and their own judgement.

**Active share:** Portfolio active share measures how different from the reference indicator the portfolio is. The closer the active share is to 100%, the less identical stocks a portfolio has compared to its reference indicator, thus the more active the portfolio manager is compared to the market.

**Active Weight:** Represents the absolute value of the difference between the weight of a holding in the manager's portfolio and the same holding in the benchmark index.

**Alpha:** Alpha measures the performance of a portfolio compared to its reference indicator. Negative alpha means the fund performed less well than its reference indicator (e.g. if the indicator increased by 10% in one year and the fund increased by only 6%, its alpha is -4). Positive alpha means the fund performed better than its reference indicator (e.g. if the indicator increased by 6% in one year and the fund increased by 10%, its alpha is 4).

**Beta:** Beta measures the relationship between the fluctuations of the net asset values of the fund and the fluctuations of the levels of its reference indicator. Beta of less than 1 indicates that the fund "cushions" the fluctuations of its index (beta = 0.6 means that the fund increases by 6% if the index increases by 10% and decreases by 6% if the index falls by 10%). Beta higher than 1 indicates that the fund "magnifies" the fluctuations of its reference indicator (beta = 1.4 means that the fund increases by 14% when the index increases by 10% but also decreases by 14% when the index decreases by 10%). Beta of less than 0 indicates that the fund reacts inversely to the fluctuations of its reference indicator (beta = -0.6 means that the fund falls by 6% when the index increases by 10% and vice versa).

**Capitalisation:** A company's stock market value at any given moment. It is obtained by multiplying the number of shares of a company by its stock exchange price.

**Investment/net exposure rate:** The investment rate constitutes the volume of assets invested expressed as a percentage of the portfolio. Adding the impact of the derivatives to this investment rate results in the net exposure rate, which corresponds to the real percentage of asset exposure to a certain risk. Derivatives can be used to increase the underlying asset's exposure (stimulation) or reduce it (hedging).

**Net asset value:** Price of all units (in an FCP) or shares (in a SICAV).

**VaR:** Value at Risk (VaR) represents an investor's maximum potential loss on the value of a financial asset portfolio, based on a holding period (20 days) and confidence interval (99%). This potential loss is expressed as a percentage of the portfolio's total assets. It is calculated on the basis of a sample of historical data (over a two-year period).

**Volatility:** Range of price variation of a security, fund, market or index, which enables the measurement of risk over a given period. It is determined using the standard deviation obtained by calculating the square root of the variance. The variance is obtained by calculating the average deviation from the mean, which is then squared. The greater the volatility, the greater the risk.

## ESG DEFINITIONS & METHODOLOGY

**ESG:** E for Environment, S for Social, G for Governance

**ESG score Calculation:** Only the Equity and Corporate Bond holdings of the fund considered. Overall Fund Rating calculated using MSCI Fund ESG Quality Score methodology: excluding cash and non ESG-rated holdings, performing a weighted average of the normalized weights of the holdings and the Industry-Adjusted Score of the holdings, multiplied by (1+Adjustment%) which consists of the weight of positively trending ESG ratings minus the weight of ESG laggards minus the weight of negatively trending ESG ratings. For a detailed explanation see "MSCI ESG Fund Ratings Methodology", Section 2.3. Updated June 2023. <https://www.msci.com/documents/1296102/34424357/MSCI+ESG+Fund+Ratings+Methodology.pdf>

**MSCI methodology:** MSCI uses company disclosed emissions where available. In the instance these are not available, they use their proprietary model to estimate emissions. The model has three distinct modules, production model (used for power-generating utilities), company-specific intensity model (used for companies that have reported carbon emissions data in the past but not for all years), & industry segment-specific intensity model (used for companies that have not reported any carbon emissions data in the past). For further information, please visit MSCI's latest "Climate Change Metrics Methodology" document.

**Principal Adverse Impacts (PAI):** Negative, material, or potentially material effects on sustainability factors that result from, worsen, or are directly related to investment choices or advice performed by a legal entity. Examples include GHG emissions and carbon footprint.

**Scope 1:** Greenhouse gas emissions generated from burning fossil fuels and production processes which are owned or controlled by the company.

**Scope 2:** Greenhouse gas emissions from consumption of purchased electricity, heat or steam by the company.

**Scope 3:** Other indirect Greenhouse gas emissions, such as from the extraction and production of purchased materials and fuels, transport-related activities in vehicles not owned or controlled by the reporting entity, electricity-related activities (e.g. T&D losses) not covered in Scope 2, outsourced activities, waste disposal, etc.

**SFDR Fund Classification:** Sustainable Finance Disclosure Regulation (SFDR) 2019/2088. EU Act that requires asset managers to classify funds into categories, "Article 8" funds promote environmental and social characteristics, "Article 9" funds have sustainable investments as a measurable objective. In addition to not promoting environmental or social characteristics, "Article 6" funds have no sustainable objectives. For more information, please refer to <https://eur-lex.europa.eu/eli/reg/2019/2088/oj>

**Sustainable Investments:** The SFDR defines sustainable investment as an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Taxonomy Alignment:** In the context of an individual company, taxonomy alignment is defined as the proportion of a company's revenue that comes from activities that meet certain environmental criteria. In the context of an individual fund or portfolio, alignment is defined as the portfolio-weight weighted average taxonomy alignment of included companies. For more information, please follow this link: [https://ec.europa.eu/info/sites/default/files/business\\_economy\\_euro/banking\\_and\\_finance/documents/sustainable-finance-taxonomy-faq\\_en.pdf](https://ec.europa.eu/info/sites/default/files/business_economy_euro/banking_and_finance/documents/sustainable-finance-taxonomy-faq_en.pdf)

(1) of the amount you pay in when entering this investment. This is the most you will be charged. Carmignac Gestion doesn't charge any entry fee. The person selling you the product will inform you of the actual charge.

(2) We do not charge an exit fee for this product.

(3) of the value of your investment per year. This estimate is based on actual costs over the past year.

(4) of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the investments underlying the product. The actual amount varies depending on the quantity we buy and sell.

(5) when the share class overperforms the Reference indicator during the performance period. It will be payable also in case the share class has overperformed the reference indicator but had a negative performance. Underperformance is clawed back for 5 years. The actual amount will vary depending on how well your investment performs. The aggregated cost estimation above includes the average over the last 5 years, or since the product creation if it is less than 5 years.

(6) Please refer to the prospectus for the minimum subsequent subscription amounts. The prospectus is available on the website: [www.carmignac.com](http://www.carmignac.com).

## MAIN RISKS OF THE FUND

**EQUITY:** The Fund may be affected by stock price variations, the scale of which is dependent on external factors, stock trading volumes or market capitalization.

**CURRENCY:** Currency risk is linked to exposure to a currency other than the Fund's valuation currency, either through direct investment or the use of forward financial instruments. **DISCRETIONARY MANAGEMENT:** Anticipations of financial market changes made by the Management Company have a direct effect on the Fund's performance, which depends on the stocks selected.

**The Fund presents a risk of loss of capital.**
