LUXEMBOURG SICAV SUB-FUND

Recommended minimum investment horizon:

Monthly Factsheet - 31/03/2025

LU2585800878

# **INVESTMENT OBJECTIVE**

Carmignac Portfolio Merger Arbitrage is a UCITS fund, following an alternative investment strategy that seeks to benefit from the price discontinuities ("arbitrage") of the shares related to merger and acquisition transactions. The Fund invests in officially announced M&A deals in the developed markets. The Fund seeks to outperform its reference indicator over a 3-year investment horizon through capital growth.

Fund management analysis can be found on P.3

### FUND MANAGEMENT ANALYSIS

#### MARKET ENVIRONMENT

- In a complex market environment for most asset classes, the Merger Arb strategy demonstrated its resilience in March. Indeed, US stock indices recorded a decline of 5 to 10% at their lowest point, while the HFRX Merger Arbitrage index posted a slightly negative monthly performance of -0.17%.
- Some spreads were more volatile than average: Discover Financial Services, still awaiting approval from the Fed and DOJ; Ansys, where geopolitical tensions between China and the US are complicating the approval process by Chinese competition authorities; and Despegar, under pressure following press articles reporting malpractices revealed by a former employee.
- A dozen transactions were completed, contributing to the tightening of other spreads. Among them: Altair Engineering, Arcadium Lithium, Hargreaves Lansdown, and Pactiv Evergreen.
- Despite uncertainties related to the tariff war launched by the Trump administration, M&A activity was relatively strong in March, with around twenty transactions announced for a total amount of nearly 100 billion euros.
- Taking advantage of lower interest rates to deploy their capital more aggressively, Private Equity groups confirmed their return. They represented 30% of buyers in March. Notable transactions include two significant deals: one in the US with the acquisition of Walgreens Boots Alliance by Sycamore for 36 billion euros, and the other in Europe with the acquisition of Fortnox by EQT and First Kraft for nearly 4 billion euros.

#### PERFORMANCE COMMENTARY

- The fund recorded a positive performance over the month.
- The main contributors to performance were: Calibre Mining, Hess, and Intra-Cellular Therapies.
- The main detractors from performance were: Discover Financial Services, Ansys, and Surmodics.

#### OUTLOOK AND INVESTMENT STRATEGY

- The fund's investment rate is 39%, up from the previous month.
- With 51 positions in the portfolio, diversification remains satisfactory.
- The year 2024 was particularly challenging for Merger Arbitrage: significant antitrust pressure, especially in the US, with blocked deals (Capri, Albertsons) and others under increased scrutiny (Hess, Pioneer Natural Resources, Catalent, Juniper). The expected rebound in M&A activity was not as strong due to this heightened regulatory oversight.
- Additionally, highly volatile deals (DS Smith, United States Steel, China Traditional Chinese Medicine) led to the unwinding and closure of several Merger Arbitrage portfolios within major investment platforms.
- The outlook for 2025 is much more promising, thanks to a more favourable antitrust environment for M&A activity globally: a change in administration in the US following Trump's election, the publication of the Draghi report in Europe recommending the emergence of national champions to face global competition, UK regulators being pushed by the political class to prioritize economic activity, and the Japanese market continuing to open up to foreign capital.
- The decrease in interest rates is also expected to drive M&A activity in the coming quarters.

# **PORTFOLIO ESG SUMMARY**

This financial product is classified Article 8 of the Sustainable Finance Disclosure Regulation ("SFDR"). The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product are :

- ESG analysis applied to at least 90% of the equity holding in the Long portfolio;
- The Sub-Fund's equity portfolio universe is actively reduced.

### GLOSSARY

Active Management: An investment management approach where a manager aims to beat the market through research, analysis and their own judgement.

ESG score Calculation: Only the Equity and Corporate Bond holdings of the fund considered. Overall Fund Rating calculated using MSCI Fund ESG Quality Score Score of the holdings, multiplied by (1+Adjustment%) which consists of the weight of positively trending ESG ratings minus the weight of ESG Laggards minus the weight of ESG Laggards minus the weight of negatively trending ESG ratings. For a detailed explanation see "MSCI ESG Fund Ratings Methodology", Section 2.3. Updated June 2023. https://www.msci.com/documents/1296102/34424357/MSCI+ESG+Fund+Ratings+Methodology.pdf

Investment/net exposure rate: The investment rate constitutes the volume of assets invested expressed as a percentage of the portfolio. Adding the impact of the derivatives to this investment rate results in the net exposure rate, which corresponds to the real percentage of asset exposure to a certain risk. Derivatives can be used to increase the underlying asset's exposure (stimulation) or reduce it (hedging).

Merger Arbitrage Risk: The risk level of each deal from the equity long book of the portfolio is assessed to determine the risk of deal failure. Ratings are based on our in-house methodology and rated between A and C, where A is the least risky and C is the highest risk.

Merger Arbitrage Type/Nature: Each invested security is analysed to determine whether the deal from the buyer is strategic or financial and if the deal is hostile or friendly

Net asset value: Price of all units (in an FCP) or shares (in a SICAV).

SICAV: Société d'Investissement à Capital Variable (Open-ended investment company with variable capital)

# **ESG DEFINITIONS & METHODOLOGY**

ESG: E for Environment, S for Social, G for Governance

Principal Adverse Impacts (PAI): Negative, material, or potentially material effects on sustainability factors that result from, worsen, or are directly related to investment choices or advice performed by a legal entity. Examples include GHG emissions and carbon footprint.

Sustainable Investments: The SFDR defines sustainable investment as an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Taxonomy Alignment:** In the context of an individual company, taxonomy alignment is defined as the proportion of a company's revenue that comes from activities that meet certain environmental criteria. In the context of an individual fund or portfolio, alignment is defined as the portfolio-weight weighted average taxonomy alignment of included companies. For more information, please follow this link:

https://ec.europa.eu/info/sites/default/files/business\_economy\_euro/banking\_and\_finance/documents/sustainable-finance-taxonomy-faq\_en.pdf

### **MAIN RISKS OF THE FUND**

EQUITY: The Fund may be affected by stock price variations, the scale of which is dependent on external factors, stock trading volumes or market capitalization. ARBITRAGE RISK: Arbitrage seeks to benefit from such price differences (e.g. in markets, sectors, securities, currencies). If arbitrage performs unfavorably, an investment may lose its value and generate a loss for the Sub-Fund. RISH VITH THE LONG/SHORT STRATEGY: This risk is linked to long and/or short OCIATED positions designed to adjust net market exposure. The fund may suffer high losses if its long and short positions undergo simultaneous unfavourable development in opposite directions. LIQUIDITY: Temporary market distortions may have an impact on the pricing conditions under which the Fund might be caused to liquidate, initiate or modify its positions.

The Fund presents a risk of loss of capital.
