## FUND MANAGEMENT ANALYSIS

### MARKET ENVIRONMENT

- **Secondaries deal volume:** The Private Equity Secondary market remains one of the most resilient areas of private markets seeing robust growth, achieving a record \$225bn in deal volume in 2025, representing a +40% growth vs. 2024 which itself was a record year, according to Evercore. This translates to an impressive CAGR of +20% since 2013. Even after a record year, the secondaries market still represents only <3% of the Total Private Equity market (c.\$10tn in AuM, according to Pitchbook), indicating significant runway for continued growth to come. LP-led Secondaries continue to be a key driver of this growth, representing 53% of transaction volume in 2025 (vs. 47% for GP-leds).
- **Secondaries pricing:** Pricing of LP-led Secondary deals remained on the high side, though declining slightly to an average of 92 cents on the dollar (vs. 94 cents in 2024), according to Jefferies, underscoring the need to be disciplined and offer other non-price attributes such as speed and reliability of deal execution and deal structuring to remain competitive. Buyout strategies continue to comprise the majority of LP-led transaction volume, reaching 70%.

### PERFORMANCE COMMENTARY

- In May 2026, the Net Asset Value of Carmignac Private Evergreen (EUR I) delivered a stable performance of +0.1%, following the receipt of most Q1 NAVs from the underlying portfolios. Overall, underlying funds showed resilience: European strategies posted slight gains (notably FSI I and Minerva), while some North American funds were marginally down, particularly in secondary transactions such as Michigan and Roland. This stability is noteworthy given the more volatile macroeconomic and geopolitical backdrop in Q1, including public market corrections and rising commodity prices in March. The direct co-investment sleeve continues to perform strongly, supported by solid operational growth across portfolio companies. Ahead, a US-focused IT consulting firm, was revalued, reflecting above-expectation performance since early 2025.
- Today our portfolio offers exposure to >1,000 companies and is highly diversified across sectors, geographies and vintages, while still maintaining a focus on developed markets and private equity buyouts. The liquid sleeve of the portfolio is close to the target allocation of c.15% and is actively managed and invested in a curated range of Carmignac's fixed income and credit funds on a no fee basis and has generated more than 5.0% in annualised net returns since the launch of the fund.

### OUTLOOK AND INVESTMENT STRATEGY

- **Investment Strategy:** Focused on Secondaries, Carmignac Private Evergreen allows us to offer a one-stop-shop Private Equity solution for investors looking to build a diversified exposure to high quality buyout companies from Day 1. Our target allocation includes a focus on Secondaries through co-investments featuring attractive terms, combined with direct co-investments to generate alpha. Primary investments will be considered later on in the fund's life. Secondaries offer an attractive risk-return profile, thanks to the possibility to negotiate discounts and deferred payments and offers numerous benefits such as a reduced J-curve effect and blind-pool risk. It is an asset class with low correlation with both public and other private market strategies, which reiterates the complementarity of public and private strategies within an investment portfolio.
- **Outlook:** Looking ahead, the transfer of an interest in a financial services-focused fund is expected in June. The potential IPO of SpaceX (one of our largest asset) represents a key catalyst. In parallel, two LP-led secondary transactions are in advanced due diligence with Clipway. The outlook for global private equity secondary investments in 2026 remains constructive, supported by a growing supply of opportunities driven by demand for liquidity, portfolio rebalancing and desire to crystallize gains. While pricing continues to be competitive, the secondary market remains a buyers' market and continues to offer attractive entry points.

## GLOSSARY

**Co-investment:** Investments generally performed at attractive terms alongside a private equity fund leading the project.

**Direct fund:** A fund that acquires assets directly stakes in companies with the objective of unlocking value through operational, managerial and/or financial improvements.

**Diversification:** Holding a variety of investments that typically perform differently from one another in order not to overweight the risk exposure of the fund to a specific category of risk.

**Evergreen funds (also known as "open-ended" or "semi-liquid" funds):** Investment vehicles with no fixed end date which provide more flexibility than closed-end funds, allowing investors to periodically invest into and redeem units. Evergreen funds also allow investors to be fully invested upon subscription.

**General Partner (GP):** A general partner (GP) refers to the private equity firm responsible for managing a private equity fund.

**Limited Partners (LPs):** They are the investors in the fund alongside the GP, typically pension funds, insurance companies, sovereign wealth funds, endowments, family offices and Ultra-High-Net-Worth individuals (UHNWIs).

**Liquid sleeve:** Portion of the fund held in liquid assets (easily convertible into cash).

**Net asset value:** Price of all units (in an FCP) or shares (in a SICAV).

**Portfolio company:** A company in which a private equity firm has made an investment. It can be either public or private.

**Primary fund of funds:** A fund that builds a portfolio of multiple direct funds.

**Private Equity (PE):** PE is an asset class in which equity investments are made in private companies. Traditionally, PE capital comes primarily from institutional and UHNWIs that either invest directly in companies, or through funds managed by asset managers. In comparison with public equity investments, which trade daily, these are not listed. PE funds look for companies with growth potential in various sectors. PE funds cover the complete life cycle of companies from early-stage start-ups to decades-old businesses of all sizes across many industries throughout the world.

**Private markets:** This refers to investments in assets and financial instruments that are not traded on public exchanges. Its main asset class is private equity.

**Secondary funds:** A fund that acquires existing portfolios of multiple direct funds from initial investors seeking liquidity in such funds prior to their termination.

**SFDR Fund Classification:** Sustainable Finance Disclosure Regulation (SFDR) 2019/2088. EU Act that requires asset managers to classify funds into categories, "Article 8" funds promote environmental and social characteristics, "Article 9" funds have sustainable investments as a measurable objective. In addition to not promoting environmental or social characteristics, "Article 6" funds have no sustainable objectives. For more information, please refer to <https://eur-lex.europa.eu/eli/reg/2019/2088/oj>

**Vintage year:** The year in which a closed-end private equity fund began making investments.

## MAIN RISKS OF THE FUND

**LIQUIDITY:** The illiquid nature of assets might require the Fund to liquidate assets at a discount, should exceptionally large redemptions be made, forcing the Portfolio Managers to sell under unfavorable conditions such as abnormally limited volumes or unusually wide bid-ask spreads. **VALUATION:** The valuation method, which is partly based on accounting data (quarterly or semi-annually computed), and the difference in lag with which NAVs are received from the General Partners, could reflect impacts on NAV with a delay. Moreover, NAV is sensitive to the valuation methodology adopted. **DISCRETIONARY MANAGEMENT:** Investors rely solely on the discretion of the Portfolio Managers, and the level of transparency of the information available, to select and realize appropriate investments. There is no guarantee in the ultimate success of investments. **LIMITED CONTROL OVER SECONDARY INVESTMENTS:** Where the Fund makes an investment on a secondary basis, the Fund will generally not have the ability to negotiate the amendments to the constitutional documents of an underlying fund, enter into side letters or otherwise negotiate the legal or economic terms of the interest in the underlying fund being acquired. The underlying funds in which the Fund will invest generally invest wholly independently.

**The Fund presents a risk of loss of capital.**
