

Pre-contractual disclosure for the financial products referred to in Article 8(1), (2) and (2a), of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: CARMIGNAC PATRIMOINE

Legal entity identifier: 969500YXGX7FIV0U3F31

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Does this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It will make a minimum of sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It will make a minimum of sustainable investments with a social objective: ___%	<input checked="" type="checkbox"/> It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of <u>10%</u> of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promotes E/S characteristics, but will not make any sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund applies a “best-in-universe” approach (identifying companies whose activities are sustainable) and a “best-efforts” approach (consisting in favouring issuers that exhibit an improvement or strong prospects in terms of ESG practices and performance over time) in order to invest sustainably: 1) ESG integration, 2) negative screening, 3) positive screening using an approach based on the United Nations Sustainable Development Goals, 4) active stewardship to promote environmental and social characteristics, and 5) monitoring of principal adverse impacts – PAIs.

The fund does not have a reference indicator for sustainability in order to measure the fund’s ESG performance.

- **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

This fund uses sustainability indicators to measure the attainment of each of the environmental or social characteristics it promotes:

- 1) **Coverage rate of ESG analysis:** ESG integration, through ESG rating via Carmignac’s proprietary “START” (System for Tracking and Analysis of a Responsible Trajectory) platform, which includes in-house and external ESG scores, is applied to at least 90% of securities (excluding cash and derivatives).
- 2) **Reduction of the investment universe** (minimum 20% of the portfolio’s equity and corporate bond components):
 - a. **Exclusions at management company level:** unsustainable activities and practices are identified using an approach based on international standards and rules in the following areas: (a) controversies concerning the OECD Guidelines, the International Labour Organization (ILO) Declaration on Fundamental Principles and Rights at Work, and the principles of the United Nations Global Compact, (b) controversial weapons, (c) thermal coal production, (d) energy producers, (e) tobacco, (f) adult entertainment.
 - b. **Negative screening specific to the fund:** Equity portfolio positions with an MSCI rating for the environmental or social pillars of below 1.4 (on a scale from 0 to 10), and bond portfolio positions with an MSCI rating for the environmental or social pillars of below 2.5 (on a scale from 0 to 10), or with an overall MSCI rating of B or CCC (on a scale from AAA to CCC) are excluded from the fund’s investment universe. Companies with a START score of C or above (on a rating scale of A to E) may re-enter the fund once the portfolio manager has carried out ad-hoc analysis (which may entail engagement with the issuer). The table below details the correspondences between the MSCI and START ratings used by the fund for negative screening.

MSCI lower limit		START rating		MSCI upper limit
8	≤	A	≤	10
6	≤	B	<	8
4	≤	C	<	6
2	≤	D	<	4
0	≤	E	<	2

- 3) Positive screening (responsible investment):** at least 10% of the fund’s net assets are invested in the equities of companies deemed to be aligned with the United Nations Sustainable Development Goals. The minimum levels of sustainable investments with environmental and social objectives are 1% and 3% of the fund’s net assets, respectively.

An investment/issuer is aligned when at least one of the following three thresholds is reached:

- a. **Goods and services:** at least 50% of their revenue derives from goods or services linked to at least one of the following nine United Nations Sustainable Development Goals, out of 17: (1) No poverty, (2) Zero hunger, (3) Good health and well-being, (4) Quality education, (6) Clean water and sanitation, (7) Affordable and clean energy, (9) Industry, innovation and infrastructure, (11) Sustainable cities and communities and (12) Responsible consumption and production; or
- b. **Capital expenditure (CapEx):** at least 30% of capital expenditure is on business activities related to at least one of the following nine United Nations Sustainable Development Goals, out of 17: (1) No poverty, (2) Zero hunger, (3) Good health and well-being, (4) Quality education, (6) Clean water and sanitation, (7) Affordable and clean energy, (9) Industry, innovation and infrastructure, (11) Sustainable cities and communities and (12) Responsible consumption and production; or
- c. **Operations:**
 - i. The issuer is given “aligned” status, in terms of operational alignment, for at least three of the 17 United Nations Sustainable Development Goals, determined on the basis of evidence provided by the issuer regarding its policies, practices and objectives in line with these Sustainable Development Goals. “Aligned” status corresponds to an operational alignment score higher than or equal to +2 (on a scale from -10 to +10), as determined by the external rating provider selected by the management company; and
 - ii. The issuer has not been given “non-aligned” status, for operational alignment, on any of the 17 United Nations Sustainable Development Goals. “Non-aligned” status corresponds to an operational alignment score of less than or equal to -2 (on a scale from -10 to +10), as determined by the external rating provider selected by the management company.

These thresholds represent significant commitment from the issuer with respect to its contribution. To find out more about the United Nations sustainable development goals, please visit <https://sdgs.un.org/goals>.

Additional information on methodology:

First of all, in order to determine which companies are aligned **in terms of goods and services and CapEx**, the management company has identified a robust company classification system and mapped 1,700 different business activities. Furthermore, the management company uses the “SDG Compass”, a resource created by the GRI (“Global Reporting Initiative”), the United Nations Global Compact and the World Business Council for Sustainable Development, to identify the business activities that contribute to each Sustainable Development Goal. Carmignac has also created “investable themes” corresponding to business activities. The management company filters each business activity in the classification system on the basis of these themes, sorting the relevant business activities into Carmignac’s “investable themes” and using sustainable development goal targets to verify their suitability. This approach has been reviewed by members of the Responsible Investment teams.

Then, to determine which issuers are aligned **for Operations**, the management company uses an external rating methodology to create an indicative operational alignment filter. Each issuer is assessed on each of the 17 United Nations Sustainable Development Goals and its performance is rated on a scale of -10 to +10 for each of these Sustainable Development Goals. To calculate this score, for each Sustainable Development Goal there are (1) positive indicators linked to policies, initiatives and objectives with specific key performance indicators, which result in positive additions to the score, (2) negative indicators linked to controversies or adverse impacts, which result in subtractions from the score, and (3) performance indicators which assess the trajectory of the issuer's performance and which can increase or reduce the score. The three above-mentioned assessments are combined into a final score for each sustainable development goal on the above scale of -10 to +10. This means that each issuer receives 17 scores, one for each sustainable development goal, ranging from -10 to +10.

The above rating scale is subdivided into five result categories:

- Score above 5.0: strongly aligned;
- Score between 2.0 and 5.0 (inclusive): aligned;
- Score below 2.0 and above -2.0: neutral;
- Score below or equal to -2.0 and higher than -10: non-aligned;
- Score of -10: strongly non-aligned.

Once the alignment threshold is reached for goods and services, CapEx, and/or operations, the total weight of that holding is considered aligned.

- 4) Active stewardship:** ESG engagement efforts with companies, contributing to a heightened awareness and improvement in companies' sustainable development policies are measured using the following indicators: (a) level of active engagement and voting policies, (b) number of engagement efforts, (c) voting rate and (d) participation in shareholder (or bondholder) meetings.
- 5) Principal adverse impacts - PAI:** as regards monitoring principal adverse impacts, and in accordance with Annex 1 to Commission Delegated Regulation (EU) 2022/1288, the fund monitors 16 mandatory environmental and social indicators, and 2 optional indicators to demonstrate the impact of sustainable investments with respect to these indicators: greenhouse gas (GHG) emissions, carbon footprint, GHG intensity of investee companies, exposure to companies active in the fossil fuel sector, share of non-renewable energy consumption and production, energy consumption intensity per high impact climate sector, activities negatively affecting biodiversity-sensitive areas, emissions to water, hazardous waste and radioactive waste ratio, water usage and recycling (optional choice), violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises, unadjusted gender pay gap, board gender diversity, exposure to controversial weapons, excessive pay ratio (optional choice). Sovereign issuers are monitored for violations of social norms and their GHG intensity.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The fund invests at least 10% of its net assets in companies that are positively aligned with the United Nations Sustainable Investment Goals taken into consideration.

The minimum levels of sustainable investments with environmental and social objectives are 1% and 3% of the fund's net assets, respectively.

As mentioned above, an issuer is considered to be aligned when at least one of the following three thresholds is reached:

- a. **Goods and services:** at least 50% of their revenue derives from goods or services linked to at least one of the following nine United Nations Sustainable Development Goals, out of 17: (1) No poverty, (2) Zero hunger, (3) Good health and well-being, (4) Quality education, (6) Clean water and sanitation, (7) Affordable and clean energy, (9) Industry, innovation and infrastructure, (11) Sustainable cities and communities and (12) Responsible consumption and production; or
- b. **Capital expenditure (CapEx):** at least 30% of capital expenditure is on business activities related to at least one of the following nine United Nations Sustainable Development Goals, out of 17: (1) No poverty, (2) Zero hunger, (3) Good health and well-being, (4) Quality education, (6) Clean water and sanitation, (7) Affordable and clean energy, (9) Industry, innovation and infrastructure, (11) Sustainable cities and communities and (12) Responsible consumption and production; or
- c. **Operations:**
 - i. The issuer is given "aligned" status, in terms of operational alignment, for at least three of the 17 United Nations Sustainable Development Goals, determined on the basis of evidence provided by the issuer regarding its policies, practices and objectives in line with these Sustainable Development Goals. "Aligned" status corresponds to an operational alignment score higher than or equal to +2 (on a scale from -10 to +10), as determined by the external rating provider selected by the management company; and
 - ii. The issuer has not been given "non-aligned" status, for operational alignment, on any of the 17 United Nations Sustainable Development Goals. "Non-aligned" status corresponds to an operational alignment score of less than or equal to -2 (on a scale from -10 to +10), as determined by the external rating provider. These thresholds indicate significant commitment from the company with respect to its contribution. To find out more about the United Nations sustainable development goals, please visit <https://sdgs.un.org/goals>.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

The management company uses the following mechanisms to ensure that sustainable investments do not cause significant harm to any environmental or social sustainable investment objective:

- 1) Reduction of the investment universe** (minimum 20% of the portfolio's equity and corporate bond components):
 - i) **Exclusions at management company level:** unsustainable activities and practices are identified using an approach based on international standards and rules in the following areas: (a) controversies concerning the OECD Guidelines, the International Labour Organization (ILO) Declaration on Fundamental Principles and Rights at Work, and the principles of the United Nations Global Compact, (b) controversial weapons, (c) thermal coal production, (d) energy producers, (e) tobacco, (f) adult entertainment.

ii) **Negative screening specific to the fund:** Equity portfolio positions with an MSCI rating for the environmental or social pillars of below 1.4 (on a scale from 0 to 10), and bond portfolio positions with an MSCI rating for the environmental or social pillars of below 2.5 (on a scale from 0 to 10), or with an overall MSCI rating of B or CCC (on a scale from AAA to CCC) are excluded from the fund's investment universe. Companies with a START score of C or above (on a rating scale of A to E) may re-enter the fund once the portfolio manager has carried out ad-hoc analysis (which may entail engagement with the issuer).

2) **Active stewardship:** ESG engagement efforts with companies, contributing to a heightened awareness and improvement in companies' sustainable development policies are measured using the following indicators: (a) level of active engagement and voting policies, (b) number of engagement efforts, (c) voting rate and (d) participation in shareholder (or bondholder) meetings.

How have the indicators for adverse impacts on sustainability factors been taken into account?

Indicators for adverse impacts are monitored on a quarterly basis. Adverse impacts are identified based on severity. After discussion with the investment team concerned, a plan of action including an execution schedule is drawn up.

In general, dialogue with the company is the preferred plan of action in order to influence the mitigation of adverse impacts by the company concerned. In such cases, engagement with the company is included in Carmignac's quarterly engagement plan, in accordance with Carmignac's engagement policy. Divestment may be an option, with an exit strategy determined in advance within the limits of this policy.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The management company applies a screening process for controversies regarding the OECD Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights to all of the fund's investments.

The management company acts in accordance with the principles of the United Nations Global Compact (UNGC), the International Labour Organization (ILO) Declaration on Fundamental Principles and Rights at Work and the Organisation for Economic Co-operation and Development (OECD) guidelines allowing multinational enterprises to assess the standards applicable to them, including, but not limited to, violations of human rights, employment law and standard practices relating to climate.

The fund applies a controversy screening process to all its investments. Companies implicated in major controversies regarding the environment, human rights and international employment law, among other infractions, are excluded. The screening process identifies controversies on the basis of the OECD Guidelines for Multinational Enterprises and the principles of the United Nations Global Compact. This is generally referred to as "standards-based screening" and it includes restrictive screening controlled and measured using Carmignac's proprietary ESG system "START". Company controversies are researched and rated using data extracted from the ISS ESG database.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

- ✘ Yes**, the management company is committed to applying the regulatory technical standards (RTS) referred to in Annex 1 of Delegated Regulation (EU) 2022/1288, which define 16 mandatory environmental and social indicators, and two optional indicators to demonstrate the impact of sustainable investments with respect to these indicators: greenhouse gas (GHG) emissions, carbon footprint, GHG intensity of investee companies, exposure to companies active in the fossil fuel sector, share of non-renewable energy consumption and production, energy consumption intensity per high impact climate sector, activities negatively affecting biodiversity-sensitive areas, emissions to water, hazardous waste and radioactive waste ratio, water usage and recycling (optional choice), violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises, unadjusted gender pay gap, board gender diversity, exposure to controversial weapons, excessive pay ratio (optional choice). Sovereign issuers are monitored for violations of social norms with respect to their GHG intensity.

The principal adverse impacts of investment decisions on sustainability factors are set out in the PAI Integration Policy on the management company’s website. This information is disclosed in the annual reports.

No

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What investment strategy does this financial product follow?

Up to 50% of the fund's net assets may be exposed to equity markets, and at least 40% of its net assets invested in bonds, negotiable debt securities and money market instruments. As the Fund is managed on an active, flexible basis, its asset allocation may differ substantially from that of its reference indicator. As such, the portfolio manager dynamically manages exposure to the different markets and eligible asset classes, based on expectations of changes in risk/return ratios. The investment policy spreads risk by diversifying investments. Likewise, the portfolio established in each of the asset classes on the basis of detailed financial analysis may vary considerably from the weightings of the reference indicator in terms of geographical zones, sectors, ratings and maturities.

At least 10% of the fund's net assets are invested in the equities of companies that are aligned with the United Nations Sustainable Development Goals. The minimum levels of sustainable investments with environmental and social objectives are 1% and 3% of the fund's net assets, respectively.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance

An issuer is aligned when at least one of the following three thresholds is reached:

- i) **Goods and services:** At least 50% of their revenue derives from goods or services linked to at least one of the following nine United Nations Sustainable Development Goals, out of 17: (1) No poverty, (2) Zero hunger, (3) Good health and well-being, (4) Quality education, (6) Clean water and sanitation, (7) Affordable and clean energy, (9) Industry, innovation and infrastructure, (11) Sustainable cities and communities and (12) Responsible consumption and production; or
- ii) **Capital expenditure (CapEx):** at least 30% of capital expenditure is on business activities related to at least one of the following nine United Nations Sustainable Development Goals, out of 17: (1) No poverty, (2) Zero hunger, (3) Good health and well-being, (4) Quality education, (6) Clean water and sanitation, (7) Affordable and clean energy, (9) Industry, innovation and infrastructure, (11) Sustainable cities and communities and (12) Responsible consumption and production; or
- iii) **Operations:**
 - a. The issuer is given “aligned” status, in terms of operational alignment, for at least three of the 17 United Nations Sustainable Development Goals, determined on the basis of evidence provided by the issuer regarding its policies, practices and objectives in line with these Sustainable Development Goals. “Aligned” status corresponds to an operational alignment score greater than or equal to +2 (on a scale from -10 to +10), as determined by the external rating provider selected by the management company; and
 - b. The issuer has not been given “non-aligned” status, for operational alignment, on any of the 17 United Nations Sustainable Development Goals. “Non-aligned” status corresponds to an operational alignment score of less than or equal to -2 (on a scale from -10 to +10), as determined by the external rating provider selected by the management company.

These thresholds represent significant commitment from the issuer with respect to its contribution. To find out more about the United Nations Sustainable Development Goals, please visit <https://sdgs.un.org/goals>.

The investment universe is assessed in light of the ESG risks and opportunities recorded in Carmignac’s proprietary ESG platform, START.

Non-financial analysis is applied as part of the investment strategy through the following processes, which actively reduce the fund's investment universe by at least 20%. The full description of the procedure for reducing the investment universe is available in the corresponding Transparency Code, which is available at www.carmignac.com. The initial investment universe prior to the reduction includes around 2,500 issuers and is made up of the ICE BofA Global Corporate, ICE BofA Global Non-Financial High Yield, and ICE BofA Emerging Market Corporate Plus indices for the portfolio's corporate bond component, and the MSCI AC World index for the portfolio's equity component. The investment universe and the fund are periodically reviewed to maintain their alignment for the purposes of reducing the universe.

The investment universe is reduced as follows:

- i) **Exclusions at management company level:** unsustainable activities and practices are identified using an approach based on international standards and rules in the following areas: (a) controversies concerning the OECD Guidelines, the International Labour Organization (ILO) Declaration on Fundamental Principles and Rights at Work, and the principles of the United Nations Global Compact, (b) controversial weapons, (c) thermal coal production, (d) energy producers, (e) tobacco, (f) adult entertainment.
- ii) **Negative screening specific to the fund:** equity portfolio positions with an MSCI rating for the environmental or social pillars of below 1.4 (on a scale from 0 to 10), and bond portfolio positions with an MSCI rating for the environmental or social pillars of below 2.5 (on a scale from 0 to 10), or with an overall MSCI rating of B or CCC (on a scale from AAA to CCC) are excluded from the fund's investment universe. Companies with a START score of C or above (on a rating scale of A to E) may re-enter the fund once the portfolio manager has carried out ad-hoc analysis (which may entail engagement with the issuer).

Before the investment universe is reduced as described above, the equity and corporate bond universes are reweighted to eliminate any biases that could result in significant differences between the composition of the indices constituting these universes and that of the fund's portfolio. The two investment universes are reweighted using the fund's average historical weightings, observed over the past three years (corresponding to the recommended investment horizon). Each issuer is reweighted using the fund's historical weightings by sector, geographical region (emerging markets/developed markets) and capitalisation (small/mid/large), in order to represent the fund's sectoral, geographical and capitalisation rotations as accurately as possible. These weightings are rounded to the nearest whole number and reviewed by the management company on an annual basis.

The fund cannot invest more than 10% of its net assets outside its investment universe after the reduction (by at least 20%).

Lastly, as part of the management company's active stewardship, ESG engagement efforts with companies, contributing to heightened awareness and improvement in the companies' sustainable development policies are measured by the following indicators: (a) level of active engagement and voting policies, (b) number of engagement efforts, (c) voting rate and (d) participation in shareholder (or bondholder) meetings.

● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy used to select investments, and to attain each of the environmental or social characteristics promoted by this financial product, are:

- 1) At least 10% of the fund's net assets are invested in the equities of companies that are positively aligned with the United Nations Sustainable Development Goals (as listed above).
- 2) The minimum levels of sustainable investments with environmental and social objectives are 1% and 3% of the fund's net assets, respectively.
- 3) The equity and corporate bond universe is actively reduced by at least 20%.
- 4) ESG analysis is applied to at least 90% of securities (excluding cash and derivatives).
- 5) Investment in debt securities issued by public entities is limited to 70% of the net assets.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

The committed minimum rate to reduce the investment universe is 20%.

- ***What is the policy to assess good governance practices of the investee companies?***

To assess good governance practices, the fund uses Carmignac's proprietary ESG system ("START"), which collates automated key indicators on governance for over 7,000 companies, including: 1) percentage of independent members of the audit committee, average term of office for members of the board of directors, gender diversity on the board of directors, size of the board of directors, independence of the remuneration committee as regards sound management structures, and 2) director remuneration, sustainability incentives for directors, and the highest remuneration in terms of staff remuneration. Human resources are covered by Carmignac's "S" indicators (in particular staff satisfaction, the gender pay gap and staff turnover) within "START".

As regards tax, the fund recognises the companies in its investment universe that adhere to the OECD Guidelines for Multinational Enterprises on tax matters and encourages transparency where necessary.

Furthermore, as a signatory to the Principles for Responsible Investment ("PRI"), the management company expects the companies in which the fund invests to:

- 1) Publish a comprehensive tax policy describing the company's approach to tax responsibility;
- 2) Report on their tax governance and risk management processes to the competent authorities; and
- 3) File appropriate returns in each of the countries in which they operate (country-by-country reporting, "CBCR").

These considerations inform the management company's actions with respect to companies and its votes in favour of greater transparency, for example via support for shareholder resolutions.

As regards sovereign issuers, the following governance criteria are assessed: ease of doing business, tax positioning, debt ratio expressed per year of tax receipts, current account balance and economic freedom.

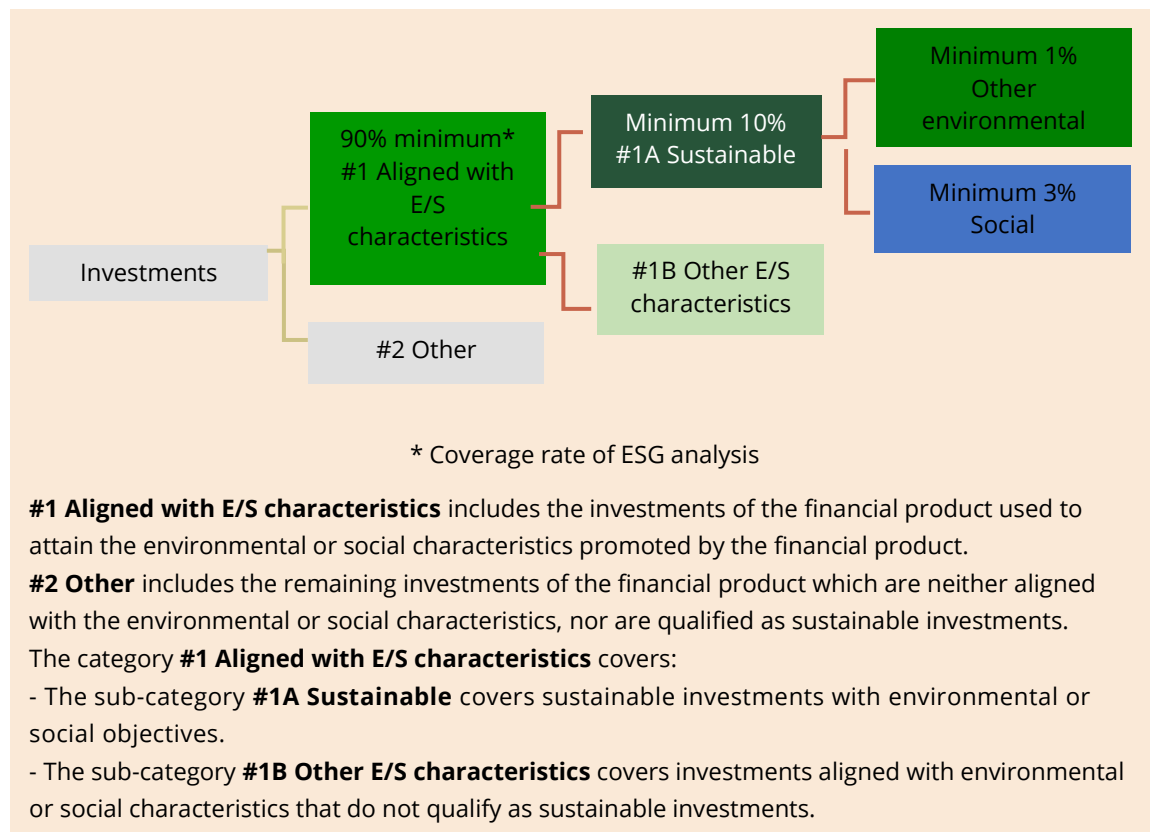

Good governance

practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the asset allocation planned for this financial product?

At least 90% of the fund's investments are intended to attain the environmental or social characteristics it promotes, in accordance with the binding elements of the investment strategy.

Minimum share of sustainable investments:

The fund invests sustainably, in that it invests at least 10% of its net assets in the equities of companies that positively align with the United Nations Sustainable Development Goals. As well as making sustainable investments accounting for at least 10% of the net assets, the fund may target companies whose goods and services, Capex and operations are not aligned with the Sustainable Development Goals taken into consideration.

Share of #2 Other investments:

Where investments fall outside the minimum limit of 90% incorporating environmental and social characteristics, ESG analysis may not have been carried out.

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies;
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy;
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

● ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?***

The use of derivatives does not contribute to the attainment of the fund's environmental and/or social characteristics.

To the extent that the fund uses derivatives linked to a single underlying, exclusions defined at management company level apply. Moreover, the fund applies a netting calculation (netting a long position against short positions in an equivalent issuer in the form of derivatives) with a view to illustrating the portfolio's ESG rating and carbon emissions and measuring adverse impacts.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The minimum level of alignment with the Taxonomy, i.e. the minimum share of the fund's investments deemed to contribute on an ongoing basis to the above environmental objectives, is 0% of assets. The actual level of alignment with the Taxonomy is calculated and published annually.

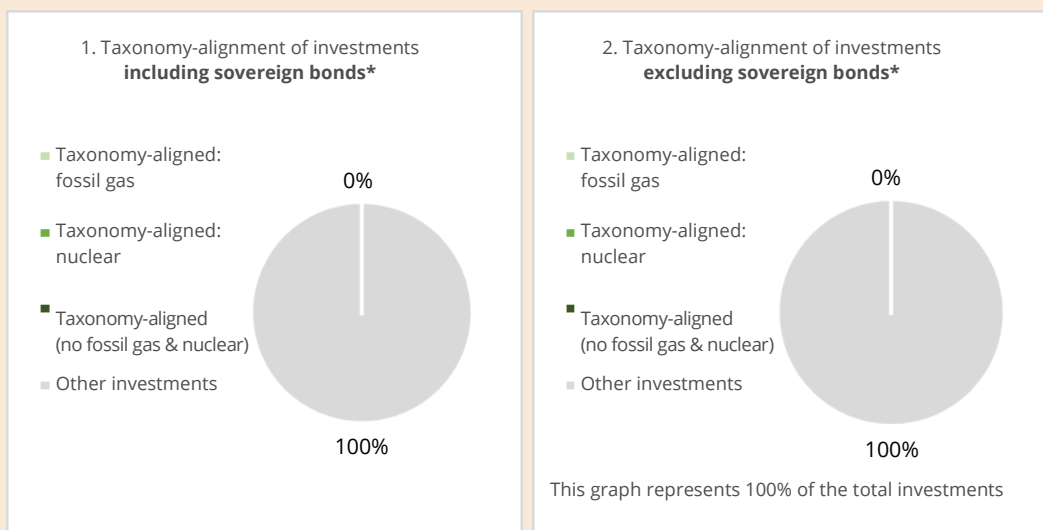

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy?**

Yes:

In fossil gas In nuclear energy

No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

● **What is the minimum share of investments in transitional and enabling activities?**

The minimum share of these investments is 0% of net assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy is 1% of the net assets.

What is the minimum share of socially sustainable investments?

The minimum share of sustainable investments with a social objective is 3% of the net assets.

What investments are included under “#2 Other”, what is their purpose and are any minimum environmental or social safeguards applied to them?

The remainder of the portfolio (i.e. beyond the minimum share of 90%) may also promote environmental and social characteristics but is not systematically covered by ESG analysis. These assets may include listed or unlisted securities, for which ESG analysis may be carried out after the financial instrument in question is acquired by the fund. Cash (and equivalent instruments) and derivatives (used for hedging or exposure purposes) are also included under “#2 Other”.

All of the fund's assets (excluding cash and derivatives) apply sectoral and standards-based negative screening and exclusions guaranteeing minimum environmental and social safeguards. Moreover, the exclusion process ensuring compliance with the do no significant harm principle, lack of significant harm, and monitoring of adverse impacts applies to all fund assets.

At issuer level (for equities and corporate bonds), investments that are not sustainable investments are assessed to ensure compliance with global standards on environmental protection, human rights, employment practices and anti-corruption measures through controversy screening (“standards-based” approach). These investments are analysed on the basis of the minimum safeguards in place to ensure that their business activities comply with the OECD Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

N/A.

- *How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?*

N/A.

- *How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?*

N/A.

- *How does the designated index differ from a relevant broad market index?*

N/A.

- *Where can the methodology used for the calculation of the designated index be found?*

N/A.

Where can I find more product specific information online?

More product-specific information can be found online on the website: www.carmignac.com, in the “Funds” and “Responsible Investment” sections.
