LUXEMBOURG SICAV SUB-FUND

G. Rigeade

E. Ben Zimra

A FLEXIBLE SOLUTION AIMING TO CAPTURE BOND OPPORTUNITIES GLOBALLY

Recommended minimum investment horizon: **3 YEARS**

SFDR Fund Classification**:

Article **8**

Carmignac Portfolio Flexible Bond is an international fixed income UCITS fund that implements interest rates and credit strategies across the globe while systematically hedging the currency risk. Its flexible and opportunistic style enables the Fund to implement a non-benchmarked, conviction-driven allocation strategy across global bond markets. In addition, the Fund seeks long-term growth through a socially responsible investment approach. It aims to outperform its reference indicator⁽¹⁾ over a minimum recommended investment period of three years.

KEY POINTS

A bond asset allocation solution based on a top-down approach and a bottom-up implementation of interest rate and credit strategies.

A flexible and non-benchmarked philosophy which enables the Fund to navigate through diverse market environments globally.

An active and conviction-driven approach aiming to seize bond market opportunities according to Fund Managers' views on each fixed income segment.

A disciplined risk management integrated into the investment process, including both financial and extra-financial criteria.

A FLEXIBLE MANAGEMENT REFLECTED IN ALL INVESTMENT DECISIONS

Fund Managers benefit from the expertise of the entire management team, and collaborate closely with **credit, emerging markets and financials specialists**.

CARMIGNAC PORTFOLIO FLEXIBLE BOND

THE RISK MANAGEMENT AT THE HEART OF THE INVESTMENT PROCESS

A flexible allocation combined with disciplined risk management

Thanks to its truly flexible approach, the Fund can navigate diverse market environments globally, with the aim of benefiting from both rising and declining rates; but this cannot go without a rigorous risk management framework which includes both investment limits and a constant risk monitoring through a wide range of tools.

MAIN RISKS OF THE FUND

INTEREST RATE: Interest rate risk results in a decline in the net asset value in the event of changes in interest rates.

CREDIT: Credit risk is the risk that the issuer may default.

CURRENCY: Currency risk is linked to exposure to a currency other than the Fund's valuation currency, either through direct investment or the use of forward financial instruments.

EQUITY: The Fund may be affected by stock price variations, the scale of which is dependent on external factors, stock trading volumes or market capitalization.

The Fund presents a risk of loss of capital.

(1) of the amount you pay in when entering this investment. This is the most you will be charged. Carmignac Gestion doesn't charge any entry fee. The person selling you the product will inform you of the actual charge.

(2) We do not charge an exit fee for this product.

(3) of the value of your investment per year. This estimate is based on actual costs over the past year.

(4) of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the investments underlying the product. The actual amount varies depending on the quantity we buy and sell.

(5) when the share class overperforms the Reference indicator during the performance period. It will be payable also in case the share class has overperformed the reference indicator but had a negative performance. Underperformance is clawed back for 5 years. The actual amount will vary depending on how well your investment performs. The aggregated cost estimation above includes the average over the last 5 years, or since the product creation if it is less than 5 years.

Bottom-up investing: Investment based on analysis of individual companies, whereby that company's history, management, and potential are considered more important than general market or sector trends (as opposed to top down investing).

High yield: A loan or bond rated below investment grade because of its higher default risk. The return on these securities is generally higher.

Investment grade: A loan or bond that rating agencies have rated AAA to BBB-, generally indicating relatively low default risk.

Modified duration: A bond's modified duration measures the risk attached to a given change in the interest rate. Modified duration of +2 means that for an instantaneous 1% rate increase, the portfolio's value would drop by 2%.

Non-benchmarked: Portfolio construction is a result of Fund manager views and market analysis with no bias to any benchmark.

Top-down investing: An investment strategy which finds the best sectors or industries to invest in, based on analysis of the corporate sector as a whole and general economic trends (as opposed to bottom up investing).
