

CARMIGNAC PORTFOLIO FLEXIBLE BOND

LUXEMBOURG SICAV SUB-FUND

A FLEXIBLE SOLUTION AIMING TO CAPTURE BOND OPPORTUNITIES GLOBALLY

Recommended
minimum investment
horizon:

3 YEARS

SFDR Fund Classification**:

Article **8**

Carmignac Portfolio Flexible Bond is an international fixed income UCITS fund that implements interest rate and credit strategies globally while systematically hedging currency risk. Its flexible and opportunistic style enables the Fund to deploy a non-benchmarked, conviction-driven allocation strategy across global bond markets. The Fund is managed with a total return approach, seeking to capture market upswings while hedging against downside risk. It promotes environmental and social characteristics and aims to outperform its reference indicator⁽¹⁾ over a recommended minimum investment horizon of three years.

KEY POINTS

A bond asset allocation solution based on a top-down approach and a bottom-up implementation of interest rate and credit strategies.

A flexible and non-benchmarked philosophy which enables the Fund to navigate through diverse market environments globally.

An active and conviction-driven approach aiming to seize bond market opportunities according to Fund Managers' views on each fixed income segment.

A disciplined risk management integrated into the investment process, including both financial and extra-financial criteria.

FLEXIBILITY EMBEDDED IN EVERY INVESTMENT DECISION

1. A BROAD INVESTMENT UNIVERSE

Combining an unconstrained asset allocation with currency hedges

The Fund has access to the entire fixed income universe: government and corporate bonds, across developed and emerging markets, rated Investment Grade or High Yield.

2. ACTIVE APPROACH TO MODIFIED DURATION

Moving swiftly in response to interest rate movements

The Fund has a wide modified duration range (from -3 to +8), which gives its managers the flexibility to benefit from both rising and falling interest rates while implementing hedging strategies when needed.

3. BOND PICKING BASED ON POOLED EXPERTISE

Building a portfolio of our strongest convictions

The Fund Managers work closely with the entire Carmignac fixed income team, and in particular with our credit and emerging market debt specialists, to identify the opportunities they consider the most promising.

MAIN RISKS OF THE FUND

INTEREST RATE: Interest rate risk results in a decline in the net asset value in the event of changes in interest rates. **CREDIT:** Credit risk is the risk that the issuer may default. **LIQUIDITY:** Temporary market distortions may have an impact on the pricing conditions under which the Fund might be caused to liquidate, initiate or modify its positions. **DISCRETIONARY MANAGEMENT:** Anticipations of financial market changes made by the Management Company have a direct effect on the Fund's performance, which depends on the stocks selected.

The Fund presents a risk of loss of capital.

(3) Taken under specific conditions.

Entry costs: One-time cost you pay in when entering this investment. This is the most you will be charged. Carmignac Gestion doesn't charge any entry fee. The person selling you the product will inform you of the actual charge. **Exit costs:** We do not charge an exit fee for this product. **Management fees and other administrative or operating costs:** This estimate is based on actual costs over the past year. **Transaction costs:** This is an estimate of the costs incurred when we buy and sell the investments underlying the product. The actual amount varies depending on the quantity we buy and sell. **Performance fees:** when the share class overperforms the Reference indicator during the performance period. It will be payable also in case the share class has overperformed the reference indicator but had a negative performance. Underperformance is clawed back for 5 years. The actual amount will vary depending on how well your investment performs. The aggregated cost estimation above includes the average over the last 5 years, or since the product creation if it is less than 5 years.

11/2025

* For the share class Carmignac Portfolio Flexible Bond A EUR Acc. Risk Scale from the KID (Key Information Document). Risk 1 does not mean a risk-free investment. This indicator may change over time. ** Sustainable Finance Disclosure Regulation (SFDR) 2019/2088. The SFDR classification of the Funds may change over time. (1) Reference indicator: ICE BofA Euro Broad Market index.

Bottom-up investing: Investment based on analysis of individual companies, whereby that company's history, management, and potential are considered more important than general market or sector trends (as opposed to top down investing).

High yield: A loan or bond rated below investment grade because of its higher default risk. The return on these securities is generally higher.

Investment grade: A loan or bond that rating agencies have rated AAA to BBB-, generally indicating relatively low default risk.

Modified duration: A bond's modified duration measures the risk attached to a given change in the interest rate. Modified duration of +2 means that for an instantaneous 1% rate increase, the portfolio's value would drop by 2%.

Non-benchmarked: Portfolio construction is a result of Fund manager views and market analysis with no bias to any benchmark.

Top-down investing: An investment strategy which finds the best sectors or industries to invest in, based on analysis of the corporate sector as a whole and general economic trends (as opposed to bottom up investing).
