Article **8**

Emerging Asia is a vast and diversified universe, offering fertile ground for stock selection and attractive growth prospects. **Carmignac Portfolio Asia Discovery** (UCITS) is an equity fund invested in Asia ex-China equities with a small and mid-cap bias. The Fund explores opportunities in these under-exploited markets, by identifying quality companies capable of generating and capitalising on their earnings over the long term ("compounders"). The Fund aims to outperform its reference indicator⁽¹⁾ over a period of at least five years through the implementation of a socially responsible approach.

KEY POINTS

Take advantage of the growth of emerging Asian economies and their wealth of opportunities

A region often overlooked by investors with numerous opportunities to capitalise on market inefficiencies.

Investing in secular growth companies

A stock selection focused on quality companies with sustainable profitability that reinvest their profits for the future.

Capitalising on recognised expertise

An experienced investment team skilled at unearthing hidden gems in the Asian universe, particularly in small and mid-caps, and also in IPOs.

A portfolio diversification tool

A decorrelation solution thanks to an exposure to a wide range of investment themes.

DIVERSIFIED INVESTMENT OPPORTUNITIES ACROSS THE REGION

India and Philippines

Leaders in export of services and resultant domestic consumption

South Korea and Taiwan

Advanced technology ecosystems (e.g AI)

Indonesia and Malaysia

Economies enriched by critical commodities

Vietnam and Malaysia

Goods export powerhouses and their domestic consumption

MAIN RISKS OF THE FUND

EQUITY: The Fund may be affected by stock price variations, the scale of which is dependent on external factors, stock trading volumes or market capitalization. **EMERGING MARKETS:** Operating conditions and supervision in "emerging" markets may deviate from the standards prevailing on the large international exchanges and have an impact on prices of listed instruments in which the Fund may invest. **CURRENCY:** Currency risk is linked to exposure to a currency other than the Fund's valuation currency, either through direct investment or the use of forward financial instruments. **LIQUIDITY RISK:** The Fund may hold securities with reduced market exchange volumes and which may, in certain circumstances, be relatively illiquid. The Fund is therefore exposed to the risk that it may not be possible to liquidate a position in the desired time frame and at the desired price.

The Fund presents a risk of loss of capital.

Please refer to the Fund's prospectus to view the exhaustive list of risks.

Entry costs: One-time cost you pay in when entering this investment. This is the most you will be charged. Carmignac Gestion doesn't charge any entry fee. The person selling you the product will inform you of the actual charge. **Exit costs:** We do not charge an exit fee for this product. **Management fees and other administrative or operating costs:** This estimate is based on actual costs over the past year. **Transaction costs:** This is an estimate of the costs incurred when we buy and sell the investments underlying the product. The actual amount varies depending on the quantity we buy and sell. **Performance fees:** when the share class overperforms the Reference indicator during the performance period. It will be payable also in case the share class has overperformed the reference indicator but had a negative performance. Underperformance is clawed back for 5 years. The actual amount will vary depending on how well your investment performs. The aggregated cost estimation above includes the average over the last 5 years, or since the product creation if it is less than 5 years.

* For the share class Carmignac Portfolio Asia Discovery A USD Acc Hdg, Risk Scale from the KID (Key Information Document). Risk 1 does not mean a risk-free investment. This indicator may change over time. ** Sustainable Finance Disclosure Regulation (SFDR) 2019/2088. The SFDR classification of the Funds may change over time. (1) Reference indicator: MSCI EM Asia Ex-China IMI 10/40 Capped NR index.

"Alpha: The alpha used in this reporting is Jensen's Alpha. It measures the risk-adjusted performance of a portfolio relative to its benchmark. A negative alpha indicates underperformance, meaning that the fund has performed worse than its benchmark. Conversely, a positive alpha indicates outperformance, meaning that the fund has performed better than its benchmark. Jensen's Alpha = Portfolio Return ? [Risk-Free Rate + Portfolio Beta x (Benchmark Return ? Risk-Free Rate)]. The final result is then rounded to one decimal place." Bottom-up investing: Investment based on analysis of individual companies, whereby that company's history, management, and potential are considered more important than general market or sector trends (as opposed to top down investing).
