Emerging Asia is a vast and diversified universe, offering fertile ground for stock selection and attractive growth prospects. **Carmignac Portfolio Asia Discovery** (UCITS) is an equity fund invested in Asia ex-China equities with a small and mid-cap bias. The Fund explores opportunities in these under-exploited markets, by identifying quality companies capable of generating and capitalising on their earnings over the long term ("compounders"). The Fund aims to outperform its reference indicator<sup>(1)</sup> over a period of at least five years through the implementation of a socially responsible approach.

### MAIN RISKS OF THE FUND

**EQUITY:** The Fund may be affected by stock price variations, the scale of which is dependent on external factors, stock trading volumes or market capitalization. **EMERGING MARKETS:** Operating conditions and supervision in "emerging" markets may deviate from the standards prevailing on the large international exchanges and have an impact on prices of listed instruments in which the Fund may invest. **CURRENCY:** Currency risk is linked to exposure to a currency other than the Fund's valuation currency, either through direct investment or the use of forward financial instruments. **LIQUIDITY RISK:** The Fund may hold securities with reduced market exchange volumes and which may, in certain circumstances, be relatively illiquid. The Fund is therefore exposed to the risk that it may not be possible to liquidate a position in the desired time frame and at the desired price.

**The Fund presents a risk of loss of capital.**
