Recommended minimum investment horizon: **3 YEARS**

SFDR Fund Classification\*\*:

Article **8**

**Carmignac Portfolio Global Bond** is an international fixed income UCITS fund that applies interest rate, credit and currency strategies to take advantage of the global macroeconomic cycle. Its dynamic and flexible approach enables the Fund to deploy a conviction-driven and non-benchmarked allocation strategy and to fully exploit the many performance drivers available in the fixed income universe. The Fund promotes environmental and social characteristics and aims to outperform its reference indicator<sup>(1)</sup> over a recommended minimum investment horizon of three years.

### KEY POINTS

**Access to a wide range of performance drivers:** the Fund implements interest rate, credit and currencies strategies in both developed and emerging markets.

**A conviction-driven, non-benchmarked philosophy:** portfolio construction is the result of Fund Managers' views and extensive market analysis with no bias to any benchmark.

**A truly flexible and opportunistic approach:** the wide modified duration range (from -4 to +10) offers the Fund a large degree of latitude, which allows it to swiftly adapt to changing scenarios.

**A disciplined risk management** fully integrated into the investment process.

### A GLOBAL AND FLEXIBLE INVESTMENT PROCESS

#### MACROECONOMIC SCENARIO

Identification of structural trends and key investment themes in fixed income markets.

#### ASSET ALLOCATION

Definition of performance drivers and interest rate, credit and currency strategies depending on different market cycles.

#### PORTFOLIO CONSTRUCTION

Selection of securities on the basis of top-down and bottom-up strategies.

#### RISK MANAGEMENT

Permanent control over the portfolio's risk/reward profile in order to optimise performance while mitigating downside risk.

### MAIN RISKS OF THE FUND

**CREDIT:** Credit risk is the risk that the issuer may default. **INTEREST RATE:** Interest rate risk results in a decline in the net asset value in the event of changes in interest rates. **CURRENCY:** Currency risk is linked to exposure to a currency other than the Fund's valuation currency, either through direct investment or the use of forward financial instruments. **DISCRETIONARY MANAGEMENT:** Anticipations of financial market changes made by the Management Company have a direct effect on the Fund's performance, which depends on the stocks selected.

**The Fund presents a risk of loss of capital.**
