Article **9**

Faced with a technological revolution that is transforming the entire economy, adopting a selective approach is essential to capture its long-term growth potential. **Carmignac Portfolio Tech Solutions** is a global equity fund (UCITS) dedicated to technology-related stocks, with no geographical or market-cap constraints. Driven by the potential of technological innovation, the Fund adopts a differentiated approach: identifying companies with profitable growth, beyond the major technology leaders, without investing at any price. Its value-chain analysis enables it to target key but less visible players, particularly among small and mid-cap companies and emerging markets.

The Fund aims to outperform its reference indicator⁽¹⁾ over a period of more than five years.

KEY POINTS

Investing in **companies that are driving innovation** that represent a solution to a changing world.

An opportunistic approach capturing attractive trends worldwide **across the value chain**.

A strategy seeking a **positive impact on the environment and society**, aligned with the UN Sustainable Development Goals.

A strategy that goes beyond investing in the tech sector by **capturing technology in a wider spectrum**.
