**Carmignac Portfolio Investissement** is an international equity fund seeking to offer exposure to companies with a secular growth profile, without restrictions in terms of sectors, regions and investment style. The Fund also aims, over a recommended investment horizon of five years, to outperform its reference indicator<sup>(1)</sup> through a sustainable investment approach.

## KEY POINTS

An international equity fund offering an exposure to **companies that thrive in an evolving global world**.

An **unconstrained approach** to unearth promising and undervalued companies with a long-term potential.

Stock picking based on **innovative companies**, with strong ownership structure, offering indispensable products.

Focusing on **companies that are trading at a price below their intrinsic value** to boost alpha generation.

## OFF THE BEATEN PATH APPROACH

Embracing the road less travelled through three complementary pillars

### INVESTING ACROSS THE VALUE CHAINS

By mapping sector ecosystems to uncover value and hidden profit drivers, we pinpoint innovative, often overlooked companies with strong but undervalued fundamentals.

### UNCOVERING HIGH QUALITY SMALL & MID-CAP COMPANIES

A targeted exposure to small and mid-caps reveals attractively valued companies with distinct local growth engines or niche market power which are often missing from large indices.

### UNLOCKING EMERGING MARKET POTENTIAL

Local insight in emerging markets uncovers mispriced, well-governed growth companies with fundamentals on a par with developed economies.

## MAIN RISKS OF THE FUND

**EQUITY:** The Fund may be affected by stock price variations, the scale of which is dependent on external factors, stock trading volumes or market capitalization. **CURRENCY:** Currency risk is linked to exposure to a currency other than the Fund's valuation currency, either through direct investment or the use of forward financial instruments. **DISCRETIONARY MANAGEMENT:** Anticipations of financial market changes made by the Management Company have a direct effect on the Fund's performance, which depends on the stocks selected.

**The Fund presents a risk of loss of capital.**
