SFDR Fund Classification\*\*:

Article 8

**Carmignac Portfolio Climate Transition** is a thematic equity fund (UCITS) investing in innovative companies that are actively addressing or contributing to climate change mitigation across the whole renewable energy and industry value chains. The Fund seeks to generate attractive returns by investing in long-term sustainable growth sectors and companies at the heart of the "green" revolution, while positively contributing to the environment and decarbonization efforts by helping to transition to a lower carbon economy. The Fund's objective is to outperform its reference indicator<sup>(1)</sup> over five years and is designed for investors wishing to invest efficiently and with a purpose on this transformational environment theme.

### KEY POINTS

**Investing with a purpose:** A fund aiming to generate attractive returns while having a positive environmental contribution

**Investing efficiently:** A differentiated approach targeting the whole renewable energy and industrial value chain, not only its output

**Investing sustainably:** Addressing today's environmental challenges

**Investing in innovation:** Targeting innovative and sustainable growth companies with a technological edge and solid business models

### A DIFFERENTIATED INVESTMENT APPROACH

The traditional investment approach to fight against climate change is to invest in 'green' or 'clean' companies. These companies, which we call the green energy providers, are only part of the solution. For us, tackling the climate change problem requires a more holistic approach consisting in investing in companies operating along the entire value chain, including the **enablers and the transitioners**.

The green energy providers: Companies providing low carbon solutions, whether product or services, for a cleaner and greener planet  
e.g. **renewable energy produced by wind turbines**

The enablers: Companies enabling others to achieve emissions reduction, energy efficiency or provide low carbon solutions  
e.g. **eco friendly thermal insulation providers essential for building efficiency**

The transitioners: Companies which have the highest emission reduction potential, transitioning towards net zero carbon emissions by 2050  
e.g. **oil or mining activities**

\* For the share class Carmignac Portfolio Climate Transition FW GBP Acc. Risk Scale from the KIID (Key Investor Information Document). Risk 1 does not mean a risk-free investment. This indicator may change over time. \*\* The Sustainable Finance Disclosure Regulation (SFDR) 2019/2088 is a European regulation that requires asset managers to classify their funds as either 'Article 8' funds, which promote environmental and social characteristics, 'Article 9' funds, which make sustainable investments with measurable objectives, or 'Article 6' funds, which do not necessarily have a sustainability objective. For more information please refer to <https://eur-lex.europa.eu/eli/reg/2019/2088/oj>. (1) Reference indicator: MSCI AC World NR index. (2) According to EU taxonomy standards.

**MARKETING COMMUNICATION** - Please refer to the KIID/prospectus of the fund before making any final investment decisions.

*Sidestepping mining companies that are vital for alternative energy producers, and abandoning high carbon emitting companies to their fate is not only inefficient, it is counterproductive. Targeting clean or green companies is an appropriate way to invest and act for climate, but it is far from complete.*

## MAIN RISKS OF THE FUND

**EQUITY:** The Fund may be affected by stock price variations, the scale of which is dependent on external factors, stock trading volumes or market capitalization.

**COMMODITIES:** Changes in commodity prices and the volatility of the sector may cause the net asset value to fall.

**CURRENCY:** Currency risk is linked to exposure to a currency other than the Fund's valuation currency, either through direct investment or the use of forward financial instruments.

**DISCRETIONARY MANAGEMENT:** Anticipations of financial market changes made by the Management Company have a direct effect on the Fund's performance, which depends on the stocks selected.

**The Fund presents a risk of loss of capital.**

## CHARACTERISTICS

Share Class	Date of 1st NAV	SEDOL	ISIN	Dividend policy	Minimum Initial Subscription <sup>(1)</sup>	Management Fee	Ongoing Charge <sup>(2)</sup>	Variable Management Charge	Maximum Subscription Fee <sup>(3)</sup>
FW GBP Acc	15/11/2013	BGP6SS8	LU0992629401	Accumulation	—	Max. 1.05%	1.35%	0%	—

(1) Please refer to the prospectus for the minimum subsequent subscription amounts. The prospectus is available on the website: [www.carmignac.com](http://www.carmignac.com).

(2) Ongoing charges are based on the expenses for the last financial year ended. They may vary from year to year and do not include performance fees or transaction costs.

(3) Entry charges paid to distributors. No redemption fees.

Volatility: Range of price variation of a security, fund, market or index, which enables the measurement of risk over a given period. It is determined using the standard deviation obtained by calculating the square root of the variance. The variance is obtained by calculating the average deviation from the mean, which is then squared. The greater the volatility, the greater the risk.
