Emerging markets remain a rich hunting ground for investors in search of attractive growth and alpha generation opportunities. As experts in emerging markets, investing since our inception in 1989, we are well placed to harness their full potential.

Carmignac Emergents (UCITS) is an equity fund that seeks to identify attractive opportunities across the emerging universe. The Fund adopts a socially responsible approach, favouring countries and companies offering long-term growth potential. The Fund aims to outperform its reference indicator⁽¹⁾ over a recommended investment horizon of 5 years.

KEY POINTS

Built on **longstanding emerging market expertise**, aimed at capturing the most profitable equity opportunities.

Focusing on companies operating in countries with **strong & healthy macroeconomic fundamentals**.

An actively managed equity exposure to adapt to changing market conditions and limit volatility.

Environmental, social and governance criteria are fully **integrated to the investment process**.

AN INVESTMENT PROCESS FOCUSED ON STRUCTURAL GROWTH, REGARDLESS OF ECONOMIC & MARKET CYCLES

Combining a fundamental **TOP-DOWN** analysis with a disciplined **BOTTOM-UP** approach to pick the right:

Emerging market countries with **healthy macroeconomic fundamentals** offering high domestic growth and sound current account balances.

Underpenetrated sectors that stand to benefit from long-term growth themes and grow regardless of general market direction.

Quality & growth companies offering attractive and sustainable cash generation, that show good earning visibility across economic cycles, and are able to compound growth over the long term.

FOCUS ON UNDERPENETRATED SECTORS

We believe the most compelling way to perform regardless of general market direction is to identify the most attractive opportunities in the vibrant emerging universe.

We do this by pinpointing businesses in underpenetrated sectors. With more than 10 years of growth ahead of them, these high-potential companies have the power to grow without sacrificing profitability.

Underpenetration goes hand in hand with sustainability: we also favour businesses which bring solutions to environmental and social challenges within emerging markets.
