SFDR Fund Classification**:

Article **8**

Carmignac Portfolio Global Bond is an international fixed income fund that applies interest rate, credit and currency strategies depending on the global macroeconomic cycle. Its dynamic and flexible approach enables the Fund to apply a conviction-driven and non-benchmarked allocation strategy and thus fully exploit the many performance drivers available in the fixed income universe. The Fund aims to outperform its reference indicator⁽¹⁾ over a recommended minimum investment horizon of three years.

KEY POINTS

Access to a wide range of performance drivers: the Fund implements interest rate, credit and currencies strategies in both developed and emerging markets.

A conviction-driven, non-benchmarked philosophy: portfolio construction is the result of Fund Managers' views and extensive market analysis with no bias to any benchmark.

A truly flexible and opportunistic approach: the wide modified duration range (from -4 to +10) offers the Fund a large degree of latitude, which allows it to swiftly adapt to changing scenarios.

A disciplined risk management integrated into the investment process, including both financial and extra-financial criteria.

Top-down investing: An investment strategy which finds the best sectors or industries to invest in, based on analysis of the corporate sector as a whole and general economic trends (as opposed to bottom up investing).
