Article **8**

**Carmignac Portfolio China New Economy** is an equity fund looking to seize investment opportunities arising mainly, but not exclusively, from China's New Economy. The latter offers numerous sustainable growth themes in areas such as healthcare, education, clean energy, technological innovation and new consumption, including e-commerce and new consumer goods which benefit from the increasing purchasing power and improving living standards of Chinese households. The Fund follows a socially responsible investment (SRI) approach and its objective is to outperform its reference indicator over at least 5 years. It also looks to minimize its environmental impact by reducing its carbon footprint by 5% annually and is classified as Article 8 according to the SFDR<sup>(1)</sup>.

### KEY POINTS

**Investing with conviction:** Seeking companies in China's New Economy, which benefit from the country's economic transition and long-term reform.

**Investing with selectivity:** Favouring domestic quality companies which have high growth visibility and a leading position in their respective sector.

**Investing sustainably:** Analysing companies according to their financial profile but also their Environmental, Social and Governance (ESG) practices.

**Investing with experience:** We have a strong expertise in Chinese investments since 1989, reinforced by Haiyan's 20-year experience in the Chinese market.

### WHY INVEST IN CHINESE EQUITIES?

China is the second biggest economy worldwide (17% of the world's GDP) and the second biggest market after the United States (\$19 Tn market capitalisation<sup>(2)</sup>). It has a high growth potential driven by powerful long-term trends that we seek to exploit in our Fund:

1.

**Digitalization and tech innovation** – Looking to become independent and a leader

2.

**Consumption upgrade** – Growing domestic demand on the back of increasing purchasing power and rising living standards

3.

**The Green revolution** – Fighting pollution with the aim of being carbon neutral by 2060<sup>(3)</sup>

4.

**Healthcare & medical innovation** – Innovating to meet the needs of an ageing population and better healthcare
