Objectives and investment policy

The key features of the sub-fund are as follows:

- The sub-fund aims to outperform its reference indicator.
- The reference indicator is the Euro MTS 1-3 Year index. This index replicates the performance of the 1-3 year government bond market denominated in euro, dividends reinvested. It includes prices provided by more than 250 members of the market. These securities include bonds from Austria, Belgium, Finland, France, Germany, Greece, Ireland, Italy, the Netherlands, Portugal and Spain as well as semi-government bonds.
- The portfolio mainly comprises bonds, debt securities and money market instruments denominated mostly in euro, as well as variable rate bonds. The weighted average of bond ratings shall be at least investment grade. No more than 10% of the net assets may be invested in bonds unrated or rated below investment grade for each category of issuer. The portfolio's modified duration is between -3 and +4. Modified duration is defined as the change in portfolio capital (as %) for a change in interest rates of 100 basis points.

- Category 1 does not mean the investment is risk-free.
- This sub-fund is placed in category 2 owing to its exposure to interest rate and credit risks.

Other information:

- The sub-fund may invest up to 20% of its assets in deposits with the same credit institution.
- Up to 8 % of the net assets may be invested in contingent convertible bonds ("CoCos"). CoCos are regulated subordinated debt instruments that are complex, but consistent in nature. Please refer to the prospectus for more information.
- The sub-fund may invest up to 10% of its net assets in units or shares of French and/or foreign UCIs and/or non-UCIs.
- Due to the sub-fund's exposure to the eurozone fixed income markets, the recommended investment period is two years.
- Investments may be redeemed each business day on request. Subscription and redemption requests are centralised on each NAV calculation and publication day before 15:00 CET/CEST and are executed on the next business day using the previous day's NAV.
- This unit is an accumulation unit.

Risks to which the sub-fund may be exposed and which could lead to a fall in the net asset value to which the indicator gives too little consideration:

- Counterparty risk: the sub-fund may suffer losses if a counterparty defaults and is unable to meet its contractual obligations, especially in the case of derivatives traded OTC.
- For more information on risks, please refer to the prospectus of the sub-fund.
